Yes, this is the one...

It would probably more compatible w/ the 404 if there was some language in there about Sinking Creek.

The 404 has a simple statement that seems to work pretty well. Condition #11 on the attached document explains it.

Barb Scott was copied on the 404. You may see if she has received it yet. I just got the signed permit today.

This would not require a Public Notice, right?

Isn't this the project where some of the mitigation will now come from Sinking Creek preservation? Should we alter the certification to reflect this?

Jesse,

This WQC covers three sections of US 119 relocation in Letcher County. None of the sections have started construction and will not start until probably next year at the earliest.

The WQC will expire 5/15/2010. Thus, I am requesting a renewal.

If you need more than just this email to process the renewal request, please let me know.

Thanks,
Ronald Rigney, II
KYTC
